

## D8.4 Project website report – Summary

The development of the BODEGA project website is part of the activities included in Task T8.2 (“Project website, private Internet workspace and social media presence”) carried out within Workpackage 8 (“Dissemination and Exploitation”) of the project.

The BODEGA website provides the main online access point to the project and it will be the project public showcase to interested stakeholders. The whole content of the website is public except for the BODEGA private Internet workspace area.

This deliverable aims at describing the project website, its content and the metrics used to measure the audience.

The website (for which Figure 1 presents a screenshot) can be accessed at the following URL: <http://www.bodega-project.eu>
